## KEY POINTS

- Our mission & mission

### **Vision:-**

Our vision is to provide the best e-security and solutions along with well equipped techniques in

Installations & Repair

### **Mission:-**

We ensure our customers are secured in this digital world also provide the Services and focused on relationship building with our clients

**EYE-ALERT**

BE **SAFE!** NOT **SORRY!**

○Our specialization:-

E – Surveillance

E-surveillance is the monitoring of a home, business, or individual using a variety of devices such as CCTV, legal wiretapping, cameras, digital video equipment, and other electronic, digital, and audio-visual means.

The services which we offers are:

- CCTV
- Access Control
- Public announcements
- Fire & Burglary Alarm system

CCTV:

CCTV (Closed-circuit television) monitoring which is indispensable in this modern era as it ensures the security of the property. Having CCTV cameras or even the signs that warns about “This premise is under CCTV surveillance” prevents vandalism and burglary. CCTV surveillance also helps to enhance safety of the working people in the premises.

CCTV surveillance is to be installed in the shops, Housing societies, corporate offices, city surveillance, etc

**EYE-ALERT**  
BE **SAFE!** NOT **SORRY!**

- Access Control:
- Access controls authenticate and authorize individuals to access the information they are allowed to
- see and use.
- This is used in offices in order to provide the access to required individual and to restrict the unknown
- access which is also called as restricted area. It also helps to avoid the tailgating if individual did not
- have the access control. This is been used for access as well for the biometric purpose in order to
- capture the attendance of the employee.
- Public Announcements:
- Public announcements is nothing but the public address system is an electronic sound amplification
- and distribution system with a microphone, amplifier and loudspeakers, used to allow a person
- to address a large public.
- Fire & Burglary Alarm system:
- Contemporary fire alarm systems use automatic functions to detect the occurrence of an event that
- may result in a fire. They receive a signal from a fire sensor (smoke, heat or carbon
- monoxide detector) and automatically transmit it to the fire alarm panel.
- This is primarily used in ATM's, Banks and Big societies

- IT Infra Projects
- IT Infra projects are the backbone of the data center projects. The
- data center projects comprise of the passive and active. The
- active project involves the server installation and active devices in
- the Data centers. A passive network is a type of computer network
- in which each node works on a predefined function or process.
- Passive networks don't execute any specialized code or instruction
- at any node and don't change their behavior dynamically. Typically,
- this behavior is related to each network router node. We are
- specialized to do the passive cabling and did the task for the
- government offices, Data centers in Mumbai, passive cable laying
- for railways stations. Our expertise teams are aware of the
- process and flow of the operations and the task to be assigned and
- complete as per customer requirement along with the sign off

- E-commerce
- E commerce is booming business in today's digital world. We are
- today buying each item or device online. We as PR technology also deal
- with selling the electronic products over the internet. Our
- electronic products are available online stores like ..... As we are closely
- tie up with our electronic goods manufactures so will also involve
- in the offline sales. We also have tie up with the distributor to sell
- the electronic products. We have wide range of electronic products
- like memory card, pen drive, External Hard disk, Headsets, Head
- phones.
- Telecom Projects
- We also undertake the IBD work for high rise apartments to
- provide FAT installation as per customer requirement
